Example Stem 1: Determine if each polygon is also a rhombus.

Select Yes for each polygon that is a rhombus and No for each polygon that is **not** a rhombus.

	Yes	No
 Rectangle		
 Trapezoid		
 Square		
 Parallelogram		
 Hexagon		

Answer Key

NNYNN

Elaboration on Alignment

This item shown can either be presented as a matching table (as shown) or another multi-select variation. For example, another variation might be to have the shapes in a list and say “Select all of the shapes that can also be classified as rhombi.” These item types are useful when the standards require students to classify objects into categories.
