

*“Fluency in each grade involves a mixture of just knowing some answers, knowing some answers from patterns (e.g., “adding 0 yields the same number”), and knowing some answers from the use of strategies. It is important to push sensitively and encouragingly toward fluency of the designated numbers at each grade level, recognizing that fluency will be a mixture of these kinds of thinking which may differ across students”* ([CC/OA Progression, p. 18](#)).

## Resources for Developing Grade-level Math Fluencies — Grade 5

### How to Use These Resources

This document provides a set of short activities extracted from EngageNY, an open educational resource, to supplement fluency practice. Teachers are encouraged to use the activities in their textbooks that align to grade-level standards and supplement with the resources in this document.

The activities are designed to support students’ progress toward grade-level fluencies. They are intentionally short, providing educators the flexibility to use them before or after a lesson or anytime during the school day. The resources are organized by standard.

## Grade 5 Fluency Activities

Key — “T” denotes “teacher” and “S” denotes “student”

|  |   |
|--|---|
| <p>Activity: MULTIPLY BY 10, 100, AND 1,000 (3 minutes)<br/> Materials: None<br/> Standard: 5.NBT.B.5<br/> <a href="#">EngageNY, Module 2, Lesson 1</a></p>                  | <p>Directions:<br/> T: (Write <math>3 \times 10</math>.) Say the product.<br/> S: 30.</p> <p>Repeat the process using the following possible sequence: <math>3 \times 100</math>/ <math>3 \times 1,000</math>/ <math>5 \times 1,000</math>/ <math>0.005 \times 1,000</math>/ <math>50 \times 100</math>/ <math>0.05 \times 100</math>/ <math>30 \times 100</math>/ <math>30 \times 1,000</math>/ <math>32 \times 1,000</math>/ <math>0.32 \times 1,000</math>/ <math>52 \times 100</math>/ <math>5.2 \times 100</math>/ <math>4 \times 10</math>/ <math>0.4 \times 10</math>/ <math>7 \times 100</math>/ <math>72 \times 100</math>/ <math>7.002 \times 100</math>.</p>   |
| <p>Activity: MULTIPLY BY MULTIPLES OF 10 (2 minutes)<br/> Materials: (S) Personal white board<br/> Standard: 5.NBT.B.5<br/> <a href="#">EngageNY, Module 2, Lesson 2</a></p> | <p>Directions:<br/> T: (Write <math>31 \times 10 = \_</math>.) Say the multiplication sentence.<br/> S: <math>31 \times 10 = 310</math>.<br/> T: (Write <math>310 \times 2 =</math> beside <math>31 \times 10 = 310</math>.) Say the multiplication sentence.<br/> S: <math>310 \times 2 = 620</math>.<br/> T: (Write <math>310 \times 20 =</math> below <math>310 \times 2 = 620</math>.) Write <math>310 \times 20</math> as a three-step multiplication sentence, taking out the ten.<br/> S: <math>310 \times 10 \times 2 = 6,200</math>.<br/> T: Show your personal white board. (Check for accuracy.)<br/> Direct students to solve using the same method for <math>23 \times 40</math> and <math>32 \times 30</math>.</p> <p>This activity can be repeated using the same routine with the following sequences of problems: <math>21 \times 40</math>/ <math>213 \times 30</math>/ <math>4,213 \times 20</math> or <math>41 \times 10</math>/ <math>410 \times 2</math>/ <math>32 \times 30</math>/ <math>43 \times 30</math>.</p> |
| <p>Computational Practice<br/> Standard: 5.NBT.B.5</p>   | <ul style="list-style-type: none"> <li>• <a href="#">Multiply a three-digit by a two-digit number</a></li> <li>• <a href="#">Multiply a three-digit by a three-digit number</a></li> <li>• <a href="#">Multiply a four-digit by a two-digit number</a></li> <li>• <a href="#">Multiply a four-digit by a three-digit number</a></li> </ul>  |

## Grade 5 Fluency Activities

|  |   |
|--|---|
| <p>Activity: ESTIMATE PRODUCTS (5 minutes)<br/> Materials: (S) Personal white board<br/> Standard: 5.NBT.B.5<br/> <a href="#">EngageNY, Module 2, Lesson 3</a></p>   | <p>Directions:<br/> T: (Write <math>421 \times 18 \approx \_ \times \_ = \_</math>.) Round 421 to the nearest hundred.<br/> S: 400.<br/> T: (Write <math>421 \times 18 \approx 400 \times \_ = \_</math>.) Round 18 to the nearest ten.<br/> S: 20.<br/> T: (Write <math>421 \times 18 \approx 400 \times 20 = \_</math>.) What's <math>400 \times 20</math>?<br/> S: 8,000.<br/> T: (Write <math>421 \times 18 \approx 400 \times 20 = 8,000</math>.)<br/> T: (Write <math>323 \times 21 \approx \_ \times \_ = \_</math>.) On your personal white board, write the multiplication sentence rounding each factor to arrive at a reasonable estimate of the product.<br/> S: (Write <math>323 \times 21 \approx 300 \times 20 = 6,000</math>.)<br/> Repeat the process and procedure for <math>1,950 \times 42</math> and <math>2,480 \times 27</math>. Ask students to explain the reasoning behind their estimates.</p> <p>This activity can be repeated using the same routine with the following sequences of problems: <math>409 \times 21</math>/ <math>287 \times 64</math>/ <math>3,875 \times 92</math>/ <math>6,130 \times 37</math>/ <math>412 \times 231</math>/ <math>523 \times 298</math>/ <math>684 \times 347</math>/ <math>908 \times 297</math>/ <math>421 \times 18</math>/ <math>323 \times 21</math>/ <math>1,950 \times 42</math>/ <math>2,480 \times 27</math>.</p> |
| <p>Activity: ESTIMATE PRODUCTS (4 minutes)<br/> Materials: (S) Estimate Products Pattern Sheet<br/> Notes: This fluency activity helps bolster students' understanding of and automaticity with the estimation of products.<br/> Standard: 5.NBT.B.5<br/> <a href="#">EngageNY, Module 2, Lesson 5</a></p> | <p>Directions:<br/> Distribute the Estimate Products pattern sheet, and give students two minutes to do as many problems as they can. Probe the room, correcting misunderstandings and encouraging students to use mental math strategies. When estimating, allow students flexibility when approximating factors. For example, when estimating the product of <math>23 \times 42</math>, a student may find that <math>25 \times 40</math> or <math>20 \times 40</math> are both logical approximations.</p>   |

## Grade 5 Fluency Activities

**Activity:** MULTIPLY BY MULTIPLES OF 100 (4 minutes)

**Materials:** (S) Personal white board

**Notes:** This review fluency activity helps preserve skills students learned and mastered in Module 1 and lays the groundwork for future concepts.

**Standard:** 5.NBT.B.5

[EngageNY, Module 2, Lesson 5](#)

**Directions:**

T: (Write  $31 \times 100 = \_\_$ .) Say the multiplication sentence with the answer.

S:  $31 \times 100 = 3,100$ .

T: (Write  $3,100 \times 2 = \_\_$  below  $31 \times 100 = 3,100$ .) Say the multiplication sentence.

S:  $3,100 \times 2 = 6,200$ .

T: (Write  $31 \times 200 = \_\_$  below  $3,100 \times 2 = 6,200$ .) Say  $31 \times 200$  as a three-step multiplication sentence, taking out the hundred.

S:  $31 \times 100 \times 2 = 6,200$ .

T: (Write  $31 \times 200 = 6,200$ .)

Direct students to solve using the same method for  $24 \times 300$  and  $34 \times 200$ .

This activity can be repeated using the same routine with the following sequence of problems:  $21 \times 400$ /  $312 \times 300$ /  $2,314 \times 200$ .

**Activity:** MULTIPLY (4 minutes)

**Materials:** (S) Personal white boards

**Notes:** This fluency activity reviews year-long fluency standards.

**Standard:** 5.NBT.B.5

[EngageNY, Module 6, Lesson 4](#)

**Directions:**

T: Solve  $34 \times 21$  using the standard algorithm.

S: (Solve  $34 \times 21$  using the standard algorithm. The product is 714.)

Continue the process for  $234 \times 21$ ,  $46 \times 32$ ,  $146 \times 32$ , and  $537 \times 35$ .

This activity can be repeated using the same routine with the following sequences of problems:

- |                   |                   |                   |                   |
|-------------------|-------------------|-------------------|-------------------|
| ● $45 \times 31$  | ● $45 \times 25$  | ● $49 \times 43$  | ● $68 \times 43$  |
| ● $345 \times 31$ | ● $345 \times 25$ | ● $249 \times 43$ | ● $368 \times 43$ |
| ● $47 \times 23$  | ● $59 \times 23$  | ● $67 \times 32$  | ● $76 \times 54$  |
| ● $247 \times 23$ | ● $149 \times 23$ | ● $867 \times 32$ | ● $876 \times 54$ |
| ● $753 \times 35$ | ● $756 \times 43$ | ● $938 \times 27$ | ● $978 \times 86$ |
| ● $43 \times 23$  | ● $34 \times 24$  | ● $57 \times 37$  | ● $97 \times 64$  |
| ● $543 \times 23$ | ● $134 \times 24$ | ● $457 \times 37$ | ● $897 \times 64$ |
| ● $49 \times 32$  | ● $46 \times 42$  | ● $68 \times 43$  | ● $89 \times 67$  |
| ● $249 \times 32$ | ● $346 \times 42$ | ● $568 \times 43$ | ● $789 \times 67$ |
| ● $954 \times 25$ | ● $768 \times 37$ | ● $749 \times 72$ | ● $698 \times 86$ |

# Appendix

**SPRINTS:** All 5th grade sprints related to 5.NBT.B.5 can be found in Appendix A. To view Appendix A, please see [Grade 5 Fluency Resources](#).

**Directions:** A Sprint has two parts, A and B, with closely related problems on each. Each part is organized into four quadrants that move from simple to complex. This builds a challenge into each Sprint for every learner. Before the lesson, print Sprint A and Sprint B on two separate sheets of paper. Students complete the two parts of the Sprint in quick succession with the goal of improving for the second part, even if only by one more. With practice, the following routine takes about 9 minutes.

## SPRINT A

Place Sprint A face down on student desks, and instruct students not to look at the problems until a signal is given.

T: You will have 60 seconds to do as many problems as you can. I do not expect you to finish all of them, just as many as you can, trying for your personal best.

T: Take your mark! Get set! THINK!

*Students turn papers over and work furiously to finish as many problems as they can in 60 seconds. Time precisely.*

T: Stop! Circle the last problem you completed. I will read just the answers. If you got the answer right, call out “Yes!” If you made a mistake, circle it. Ready?

*Repeat to the end of Sprint A or until no student has a correct answer.*

T: Now, at the top of the page, write the number of problems you got correct. This is your personal goal for Sprint B.

T: How many of you got one right? (All hands should go up.)

T: Keep your hand up until I say a number that is one more than the number you got right. So, if you got 14 right, when I say 15, your hand goes down. Ready?

T: (Continue quickly.) How many got two right? Three? Four? Five? (Continue until all hands are down.) If the class needs more practice with Sprint A, continue with the optional routine presented below.

T: Take one minute to do more problems on this half of the Sprint.

As students work, the student who scored highest on Sprint A might pass out Sprint B.

T: Stop! I will read just the answers. If you got it right, call out “Yes!” If you made a mistake, circle it. Ready?

Read the answers to the first half again as students stand.

**Movement:** To keep the energy and fun going, do a stretch or a movement game in between Sprints.

## SPRINT B

Place Sprint B face down on student desks, and instruct students not to look at the problems until a signal is given. Repeat the procedure for Sprint A up through the show of hands for how many correct answers.

T: Stand up if you got more correct on the second Sprint than on the first.

S: (Stand.)

T: Keep standing until I say the number that tells how many more you got right on Sprint B. If you got three more right on Sprint B than on Sprint A, when I say three, you sit down. Ready? Call out numbers, starting with one.

Students sit as the number by which they improved is called. Students may take Sprints home.
