Example Stem 2: Use the Add Arrow tool to draw **all** the lines of symmetry for the shape. If there are no lines of symmetry, click None.

NONE

Answer Key

Student creates correct line of symmetry for the figure.

Elaboration on Alignment

This item targets the part of standard 4.G.A.3 that calls for students to recognize line symmetric figures and draw lines of symmetry. By including the option for the student to choose “none” to show when there are no lines of symmetry, the item is able to target both requirements for students to first recognize a figure as line symmetric and then to create lines of symmetry for figures that have one or more.
