

**Addition with Unlike Denominators**

Warm Up:

Create equations that equal 36.

You may use addition, subtraction, multiplication and division facts. You may also use a combination of operations to write equations with parentheses, brackets and braces.

Remember order of operations is IMPORTANT!

**Addition with Unlike Denominators**

Vocabulary:

$$\frac{5}{10}$$

Circle the numerator.

Draw a box around the denominator.

Write the fraction in simplest form.

$$\frac{1}{2} \quad \frac{3}{4} \quad \frac{2}{3} \quad \frac{1}{4}$$

Which two fractions have common denominators?

Addition with Unlike Denominators

Prior Knowledge

$$\frac{2}{6} + \frac{3}{6} =$$

Addition with Unlike Denominators

**Investigate**

A. Find  $\frac{1}{2} + \frac{1}{4}$ . Place the  $\frac{1}{2}$  strip and the  $\frac{1}{4}$  strip under the 1-whole strip.

B.

3/9

Addition with Unlike Denominators

$$\frac{1}{2} + \frac{1}{3} =$$

Denominator

Simplest Form

Common Denominator

What is an equivalent fraction?

What is an equivalent fraction to  $\frac{3}{6}$  ?

Addition with Unlike Denominators

**Show What You Know!**

Model the problem below.

$$\frac{2}{6} + \frac{1}{3} =$$

Addition with Unlike Denominators

**HOT Problem**

Pose a Problem

  $\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$  Maya uses  $\frac{7}{12}$  cup of ingredients.

7/9

Addition with Unlike Denominators

**Problem Solving**

**Hot Pose a Problem**

15. Maya makes trail mix by combining  $\frac{1}{3}$  cup of mixed nuts and  $\frac{1}{4}$  cup of dried fruit. What is the total amount of ingredients in her trail mix?

  $\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$   
Maya uses  $\frac{7}{12}$  cup of ingredients.

Write a new problem using different amounts for each ingredient. Each amount should be a fraction with a denominator of 2, 3, or 4. Then use fraction strips to solve your problem.

**Pose a problem.**

**Solve your problem. Draw a picture of the fraction strips you use to solve the problem.**

Addition with Unlike Denominators

**Extend:**

Suppose Maya has three ingredients

$$\frac{1}{2} + \frac{1}{4} + \frac{1}{6} =$$

**Addition with Unlike Denominators**

### Guided / Independent Practice

**Share and Show** – Use fraction strips to find the sum. Write your answer in simplest form.

ALL

**Task Cards** – Read and solve each task card. Use fraction strips to model the problems and write the answer in simplest form. Create your own problem and switch with a partner group.

Brody/Mark      Jenny/Grace      Camille/Molly  
Abigail/Caidyn      Julia/Kelly

**ThinkCentral** – **Soar to Success (20.28 – Add Unlike Fractions)**

Sara/Clara/Autumn      Ronin/Matty

**Plan a Schedule** – Add and subtract fractions with unlike denominators (Plan a schedule task sheet)      OR

**"What's the Sum?"** – Add fractions with unlike denominators (game board and number tiles)

Charlie/Devin      Domenico/Dominic  
Evan/Bennett      Billy/Collin

**Addition with Unlike Denominators**

### Share and Show

Use fraction strips to find the sum. Write your answer in simplest form.

$\frac{2}{5} + \frac{3}{10} =$	$\frac{1}{4} + \frac{1}{12} =$
$\frac{1}{2} + \frac{3}{10} =$	$\frac{3}{4} + \frac{1}{6} =$
$\frac{1}{2} + \frac{2}{3} =$	$\frac{7}{8} + \frac{1}{4} =$

6/9

**Addition with Unlike Denominators**

### Test Prep

Addison used  $\frac{5}{6}$  yard of ribbon to decorate a photo frame. She used  $\frac{1}{3}$  yard of ribbon to decorate her scrapbook. Which fraction strips should Addison trade for the  $\frac{1}{3}$  strip in order to find how many yards of ribbon she used in all?

☐  $\frac{1}{2}$   
☐  $\frac{1}{3}$   
☐  $\frac{1}{4}$   
☐  $\frac{1}{6}$

1

$\frac{1}{6} \quad \frac{1}{6} \quad \frac{1}{6} \quad \frac{1}{6} \quad \frac{1}{6} \quad \frac{1}{6}$

**Answer**

8/9

**Addition with Unlike Denominators**

### Summarize

**Essential Question**

How can you use models to add fractions that have different denominators?

9/9

Name: \_\_\_\_\_

## Lesson 6.1 Adding Fractions with Unlike Denominators

### Investigate

Hilary is making a tote bag for her friend. She uses  $\frac{1}{2}$  yard of blue fabric and  $\frac{1}{4}$  yard of red fabric. How much fabric does Hilary use?

**Materials** ■ fraction strips ■ MathBoard

- A.** Find  $\frac{1}{2} + \frac{1}{4}$ . Place a  $\frac{1}{2}$  strip and a  $\frac{1}{4}$  strip under the 1-whole strip on your MathBoard.
- B.** Find fraction strips, all with the same denominator, that are equivalent to  $\frac{1}{2}$  and  $\frac{1}{4}$  and fit exactly under the sum  $\frac{1}{2} + \frac{1}{4}$ . Record the addends, using like denominators.

- C.** Record the sum in simplest form.  $\frac{1}{2} + \frac{1}{4} =$  \_\_\_\_\_

So, Hilary uses \_\_\_\_\_ yard of fabric.

Name: \_\_\_\_\_

## Lesson 6.1 Adding Fractions with Unlike Denominators

### Make Connections .....

Sometimes, the sum of two fractions is greater than 1. When adding fractions with unlike denominators, you can use the 1-whole strip to help determine if a sum is greater than 1 or less than 1.

Use fraction strips to solve.  $\frac{3}{5} + \frac{1}{2}$

#### STEP 1

Work with another student. Place three  $\frac{1}{5}$  fraction strips under the 1-whole strip on your MathBoard. Then place a  $\frac{1}{2}$  fraction strip beside the three  $\frac{1}{5}$  strips.

#### STEP 2

Find fraction strips, all with the same denominator, that are equivalent to  $\frac{3}{5}$  and  $\frac{1}{2}$ . Place the fraction strips under the sum. At the right, draw a picture of the model and write the equivalent fractions.

$$\frac{3}{5} = \frac{\quad}{\quad} \quad \frac{1}{2} = \frac{\quad}{\quad}$$

#### STEP 3

Add the fractions with like denominators. Use the 1-whole strip to rename the sum in simplest form.

**Think:** How many fraction strips with the same denominator are equal to 1 whole?

$$\frac{3}{5} + \frac{1}{2} = \frac{\quad}{\quad} + \frac{\quad}{\quad}$$
$$= \frac{\quad}{\quad}, \text{ or } \frac{\quad}{\quad}$$

Name: \_\_\_\_\_

## Lesson 6.1 Adding Fractions with Unlike Denominators

### Share and Show

Use fraction strips to find the sum. Write your answer in simplest form.

$$\frac{1}{2} + \frac{3}{8} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{1}{2} + \frac{2}{5} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{3}{8} + \frac{1}{4} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\frac{3}{4} + \frac{1}{3} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Name: \_\_\_\_\_

## Lesson 6.1 Adding Fractions with Unlike Denominators

### Problem Solving

#### Pose a Problem

15. Maya makes trail mix by combining  $\frac{1}{3}$  cup of mixed nuts and  $\frac{1}{4}$  cup of dried fruit. What is the total amount of ingredients in her trail mix?

$$\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$$

Maya uses  $\frac{7}{12}$  cup of ingredients.

Write a new problem using different amounts for each ingredient. Each amount should be a fraction with a denominator of 2, 3, or 4. Then use fraction strips to solve your problem.

**Pose a problem.**
